All the hardware necessary
for satisfactory installation

Models: ASD-2

Applications:

The model ASD-2 is part of the Industry Standard™ product line. So named because this line exemplifies the standard in the bathroom hardware industry. Built for medium duty applications, this model has gained wide acceptance in a variety of functions such as **laboratories, clinics, executive restrooms, and residential bathrooms**. The model ASD-2 has the potential of saving its own value in soap in a short period of time due to the regulated soap dispensing feature. It inhibits the spread of germs, and is conducive to a clean sterile environment. This soap dispenser has a thick metal base for wall mounting and a plastic façade with soap level window. Unlike deck mounted automatic soap dispensers, this soap dispenser does not require any special type of soap for refill. **You can use the soap of your choice**. The ASD-2 is designed for environment with low vandal risk.

Featuring:

- 1/2 quart soap reservoir.
- Use the soap of your choice (grit type soap not recommended)
- Battery Powered (4 Standard AA Batteries).
